

My degree and passion is in Fine Art, I am following this further within the film and television world. Having created hand-painted fans for magical sets, many backdrops for fantasy sets, illustrations for

prophecy books and heraldic crests for characters. Working closely with Designers, Art Directors and Graphic Designers to specific briefs and tight timescales within these enchanted worlds has been a dream.

Twelve plus years experience in the film industry working in the Art Department as Lead Graphic Artist, working on many fabulous projects over various eras. Having the opportunity to create beautiful props and varied dressing for sets. Seeing my ideas come to life has been truly wonderful.

I have transitioned back to my love for painting within the film world, working on handpainted illustrations, hero sketchbooks, large detailed oil paintings, miniature tiles for props, Tudor street signs, Delftware paintings, wallpapers and decorative details.

I have experience working with a wide range of mediums, I am confident working in oils, acrylic, watercolour gouache and digitally to complete paintings.
